

Sex & Relationship Education (SRE) at Blaby Stokes

The aim of SRE at Blaby Stokes is to provide children with age appropriate information, explore attitudes and values and develop skills in order to empower them to make positive decisions about their health related behaviour.

The objectives of Sex and Relationship Education are;

- To clarify/reinforce existing knowledge
- To raise pupils' self-esteem and confidence, especially in their relationships with others;
- To help pupils understand their sexual feelings and behaviour, so they can lead fulfilling and enjoyable lives;
- To help pupils' develop skills (language, decision making, choice, assertiveness) and make the most of their abilities.
- To provide the confidence to be participating members of society and to value themselves and others;
- To develop skills for a healthier safer lifestyle
- To develop and use communication skills and assertiveness skills to cope with the influences of their peers and the media
- To respect and care for their bodies
- To be prepared for puberty and adulthood

All schools must teach the following as part of the National Curriculum Science Orders; parents do not have the right to withdraw their child/children.

In the Foundation Stage

Children learn about the concept of male and female and about young animals. In ongoing PSHE work, they develop skills to form friendships and think about relationships with others.

Throughout Key Stage 1, the children will learn:

- That animals, including humans, feed, move, grow and use their senses and reproduce.
- To recognise and compare the external parts of the bodies of humans.
- That humans and animals can produce offspring and these grow into adults.
- To recognise similarities and differences between themselves and others and treat others with sensitivity.

Through work in science children learn about life cycles of some animals, understand the idea of growing from young to old and learn that all living things reproduce. They learn about the importance of personal hygiene to maintain good health. In RE and Citizenship children reflect on family relationships, different family groups and friendship. They learn about rituals and traditions associated with birth, marriage and death and talk about the emotions involved.

They begin to co-operate with others in work and play and begin to recognise the range of human emotions and ways to deal with them.

They also learn about personal safety.

Throughout Key Stage 2, the children will learn:

- That the life processes common to humans and other animals include nutrition, growth and reproduction.
- The main stages of the human life cycle

In science children build on their knowledge of life cycles and learn about the basic biology of human reproduction including birth of a baby on years 5 & 6.

Children are taught about the physical, emotional and social changes at puberty, which include personal hygiene. In RE and Citizenship, they continue to develop an understanding of relationships within a family, between friends and the community and that there are different patterns of friendship. They will develop skills needed to form relationships and to respect other people's emotions and feelings. They will consider how to make simple choices and exercise some basic techniques for resisting pressures.

Sex and relationship education should focus on the development of skills and attitudes not just the acquisition of knowledge.
